RUNNING

GEL-KAYANO™ 30 RRP \$280

Consumer Profile

Runners who tend to heel strike, overstride, land heavily and have a low cadence. Designed to provide adaptive, holistic stability and premium cushioning for distance training.

Key Features

UPPER

- Engineered stretch knit upper helps reduce the need for traditional overlays. It's breathable and also creates a more comfortable fit with better flexibility.

MIDSOLE

- The 4D GUIDANCE SYSTEM™ provides a holistic approach to stability via the shoe's wider basenets, increased heel bevel, flared midsole geometry, lateral guidance line and softer medial foam (HC43).
- Full length FF BLAST™ PLUS ECO (HC48) midsole foam (+4mm increased stack height).
- PureGEL™ technology in the rearfoot (HC15).
- HYBRID X-55 sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- ASICS AHAR™ Low Density rubber outsole is highly durable.

Rearfoot PureGEL™ Technology

FF BLAST™ PLUS ECO

High-energy Foam

Full-Ground Contact Design

GT-2000™ 12 RRP \$240

Consumer Profile

A versatile stability trainer that suits runners with a high velocity foot strike, or those who impact the midsole with a greater load, who transition with prolonged midstance timing, or lack of plyometric bound looking for a responsive, stable ride.

Key Features

UPPER

- Lean Back Achilles Construction that helps reduce irritation against the back of the foot for improved comfort.
- Engineered mesh upper material.

MIDSOLE

- Full-length FF BLAST™ PLUS (HC48) cushioning for an energised toe-off with cloud-like softness underfoot (+1mm additional foam vs previous version).
- PureGEL™ technology (HC15) in the rearfoot for impact absorption.
- 3D GUIDANCE SYSTEM™ consists of wider basenets, increased heel bevel, midsole flare and lateral guidance line for holistic stability.
- HYBRID X-30 sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- AHAR™ Low Density outsole rubber with AHARPLUS™ in high wear areas.

GT-1000™ 12 RRP \$200

Consumer Profile

Suits the runner who tends to heel strike, overstride, land heavily and have a low cadence. A versatile, durable, supportive trainer ideal for running and gym.

Key Features

UPPER

- Engineered mesh upper material with a more modern look.

MIDSOLE

- FLYTEFOAM™ cushion (HC50) in the midsole is lightweight and provides soft cushioning.
- LITETRUSST™ technology (HC58) in the midsole increases support without the need for a traditional post on the medial side of the foam.
- Rearfoot GEL™ technology (HC47) improves shock absorption.
- HYBRID Max Lite sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- AHAR™ Rubber outsole for durability.

GT-4000™ 3 RRP \$240

Consumer Profile

Ideal for heavier runners, or those with hypermobile feet that are looking for maximum support.

This runner appreciates rearfoot and midfoot support.

Key Features

UPPER

- Engineered mesh material that is designed to create a balance of comfort, breathability and support.
- 3D print support overlays for targeted support.

MIDSOLE

- Full length FLYTEFOAM™ Propel foam (HC53) offers great comfort and cushioning.
- Extended LITETRUSST™ technology (HC65) offers medial support functional for the consumer's needs.
- Rearfoot GEL™ technology for shock attenuation upon impact.
- ORTHOLITE™ X-30 sockliner.

OUTSOLE

- Full ground contact outsole geometry for a smoother, more efficient ride.
- AHARPLUS™ outsole is placed in critical areas of the outsole for exceptional durability.

Endorsed by:

GLIDERIDE™ 3 RRP \$230

Consumer Profile

Runner who prioritises a responsive forefoot and energy savings on long, recovery runs. Ideal for those with increased forefoot stiffness.

Key Features

UPPER

- Engineered Jacquard mesh upper provides a softer feel against the foot while increasing breathability.
- 3D print overlay for targeted support without extra stitching to restrict or create irritation.

MIDSOLE

- FLYTEFOAM™ technology (HC50) cushioning is placed on the bottom layer of the midsole for a soft landing, while the top layer of FF BLAST™ PLUS (HC43) is lighter and softer providing an energetic bounce back.
- GUIDESOLE technology is a combination of increased toe spring, stiffer forefoot through a hardened EVA plate at the forefoot and Guidance line. This is designed to create a smoother transition from midfoot to forefoot, decreasing the load placed on the lower limbs.
- ORTHOLITE™ X-55 sockliner.

OUTSOLE

- Full ground contact outsole geometry, coupled with a wide basenet, delivers a stable, smooth and efficient ride.

METASPEED™ SKY+ RRP \$330

Consumer Profile

Athletes looking for extreme energy return and lightness to help reach a new PB. The energy is directed in a horizontal direction to fit the running style of the stride runner.

Key Features

UPPER

- MOTION WRAP™ Mesh is a lightweight material offering advanced breathability, comfort and more supportive fit.
- Utilising approximately 50% recycled polyester.
- Redesigned upper allows for a more accommodating toe-splay and better midfoot hold.

MIDSOLE

- FF BLAST™ TURBO (HC50) - ASICS' lightest and bounciest midsole material.
- Full length carbon plate (1.1mm thickness) improves stability and helps extend the runner's stride even further than the previous version.
- The carbon plate is positioned higher and flatter in the METASPEED™ SKY+ for more aerial propulsion. There's more foam to compress for stride-style runners to achieve extra bounce.
- Non-removable sockliner.

OUTSOLE

- ASICSGRIP™ a better grip for secure feeling from start to finish.
- Toe-Spring curve and drop 5mm.

METASPEED™ EDGE+ RRP \$330

Consumer Profile

Athletes looking for extreme energy return and lightness to help reach a new PB. The energy is directed in a vertical or forward direction to fit the running style of the cadence type runner.

Key Features

UPPER

- MOTION WRAP™ Mesh is a lightweight material offering advanced breathability, comfort and more supportive fit.
- Utilising approximately 50% recycled polyester.
- Redesigned upper allows for a more accommodating toe-splay and better midfoot hold.

MIDSOLE

- FF BLAST™ TURBO (HC50) - ASICS' lightest and bounciest midsole material.
- The full length carbon plate (1.1mm thickness) improves stability and helps extend the runner's stride even further than the previous version.
- The carbon plate is positioned lower and more curved in the METASPEED™ EDGE+ for a more forward propulsion. Combined with a higher drop and toe-spring it gives the cadence-style runners a more efficient forward roll.
- Non-removable sockliner.

OUTSOLE

- ASICSGRIP™ a better grip for secure feeling from start to finish.
- Toe-Spring curve more pronounced and drop 8mm.

KIDS

Protection and Function

Durability

- GEL™ cushioning technology.
- Cm/EVA midsole (not cupped/hollow).
- Removable sockliner.

- Medial wrap-up outsole onto midsole.

- CUB MATCH™ sockliner: Available in all PS/TS models, this sockliner helps kids recognise the left shoe from the right shoe.

- Stitched rubber toe cap.

- ASICS SIZE CHECKER™: The toe print on the removable sockliner helps kids and parents identify when they are outgrowing their shoes. This feature is available in key GS/PS/TS styles.

- Solid Rubber outsole.

Specific Last

ASICS kid's shoes are designed to support the natural growth and development of children's feet. The kid's specific last creates a more spacious fit through the forefoot with better support in the midfoot and rearfoot, allowing for a smooth transition and relevance when you move from TS – PS – GS.

1. Special Grading – Proportional Fit

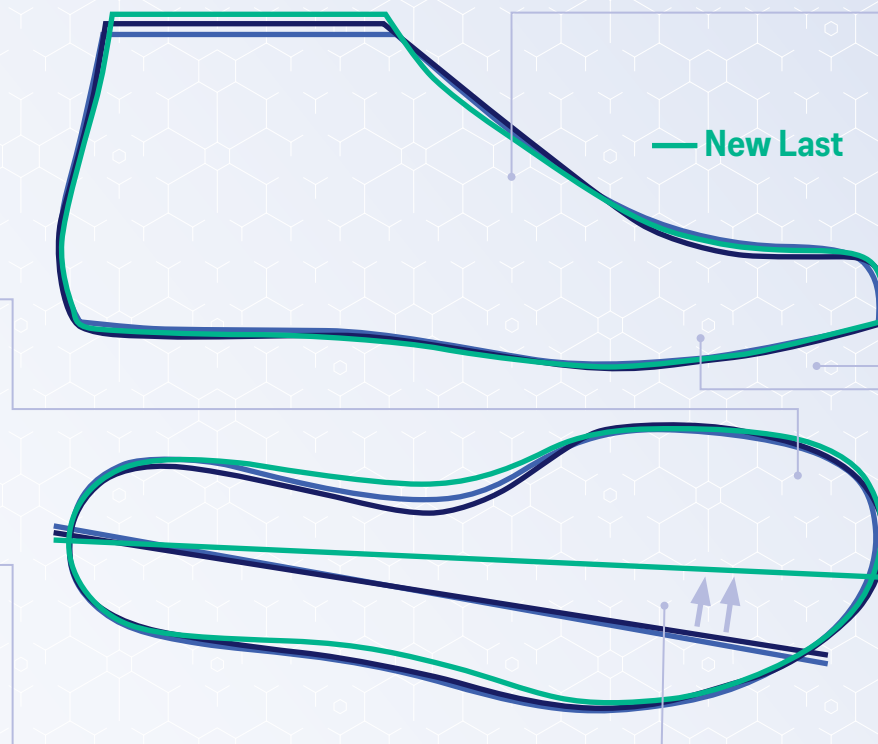

KINEMATIC COMFORT: Offer proportional fit depending on children's growth stage. (PS last proportionally offers more roomy fitting than GS last).

2. Oblique Shape With Roomy Toe Area

Children's toes are oblique – shaped unlike adults. Provide extra space in first toe for free toe movement, which enhances arch formation.

3. Centre Heel Angle

Turn heel centre inward, or more straight, just how children's feet are, to reduce pressure on the pinky toe.

4. Flatter Instep

Children's instep is flatter than adults. In this last, instep is designed flatter, which provides better fit after lacing up.

5. Moderate Toe Spring

If toe spring is too high, it is difficult to move toes freely. If toe spring is too low, children easily trip.

6. 2-5% Growth Margin in Ball Girth

Children grow quickly. Need buffer not to hamper their growth.
– Move toes freely, which enhances arch formation.

GEL-KAYANO™ 30 GS RRP \$180

Consumer Profile

The ultimate in support and cushioning for the Kid athlete. Adults takedown on a Kid's Last.

Key Features

NETBURNER™ SHIELD

GEL-NETBURNER™ 20

NETBURNER™ SHIELD RRP \$240

Consumer Profile

Netball shoe designed for any player searching for ultimate stability and support on court.

Key Features

UPPER

- Seamless mesh upper provides running shoe like comfort while a seamless panel underneath the mesh vamp helps create better support while allowing the foot to move more freely.

MIDSOLE

- The midsole combines a TPU TRUSSTIC™ unit with a Tri-density midsole (DUOMAX™ HC65 at medial midfoot - Medial FLYTEFOAM™ HC58 - Lateral FLYTEFOAM™ HC48). Together, these features improve stability during side-to-side movements and abrupt shifts in direction.

OUTSOLE

- Larger flexion grooves in the outsole's forefoot allow you to experience smoother transitions on the court.
- Solid rubber outsole that fully wraps to maximise durability of the shoe and minimise outsole wear and tear.
- Non-marking outsole.

GEL-NETBURNER 20 (D) RRP \$180

Consumer Profile

Netball player looking for a stable and highly durable shoe in a wide fit.

Key Features

UPPER

- Synthetic leather upper with high level of upper support.
- 5/8 cut collar gives increased heel depth and more support to the heel and ankle.

MIDSOLE

- FLYTEFOAM™ (HC57) midsole material providing a lightweight cushioning.
- DUOMAX™ support technology.
- TPU trusstic improves torsional rigidity providing enhanced stability and protection when pivoting and stepping.
- Rearfoot and forefoot GEL™ technology for maximum comfort underfoot.

OUTSOLE

- Solid rubber outsole that fully wraps to maximise durability of the shoe and minimise outsole wear and tear. The outsole is the thickest of any in the range.
- Non-marking outsole.

FLYTEFOAM™ Midsole Foam

Lightweight, responsive cushioning.

New Lightweight Upper and Internal Panel Construction

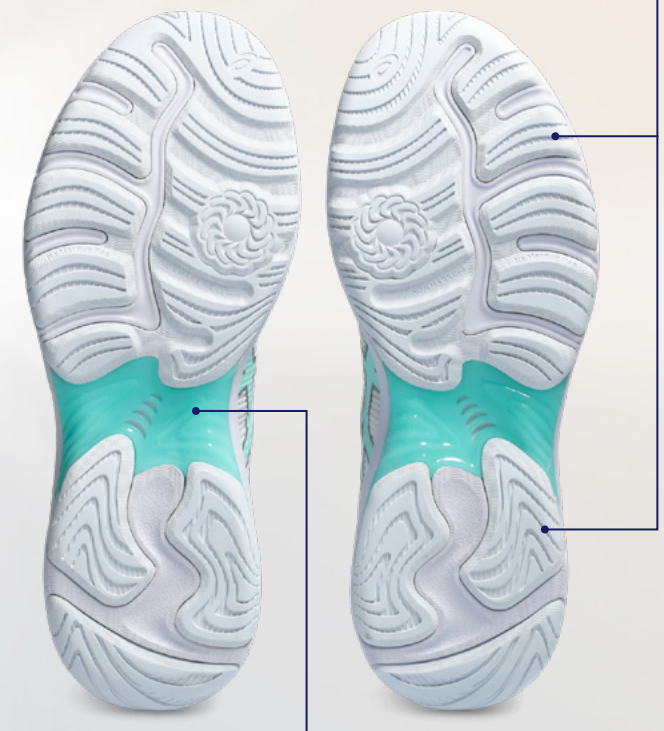

Improved midfoot support for better stability during quick movements.

NC Rubber Outsole

Non-marking outsole fully wraps to maximise durability and provide support underfoot.

Forefoot and Rearfoot Flex Grooves

Newly designed for more stability and smoother movement.

TPU TRUSSTIC

Provides torsional support and allows for agile change of direction.

NETBURNER™ PROFESSIONAL FF 4 NEW

RRP \$200

Consumer Profile

Player looking for a netball shoe that has the feel of a running shoe with a blend of flexibility, lightness and cushioning while still incorporating important features for durability, support and performance on court.

Key Features

UPPER

- Revamped lightweight upper material with new internal panel construction providing better midfoot support for better stability during quick movements.

MIDSOLE

- FLYTEFOAM™ HC55 midsole provides responsive cushioning
- Molded TPU trusstic.
- 3D Space Construction technology reduces weight and allows the midsole to deform without sacrificing durability.
- Removable arch support sockliner.

OUTSOLE

- New design to forefoot and rearfoot flex grooves to provide more stability and allow for smooth movement.
- NC rubber outsole that fully wraps to maximise durability of the shoe and minimise outsole wear and tear.
- Non-marking outsole.

TRACK & FIELD

METASPRINT RRP \$320

Consumer Profile

For elite, competitive sprinters seeking a lightweight, spikeless shoe designed to shorten the time period of contact with the ground while increasing propulsion with each stride.

Key Features

UPPER

- HL-O Mesh is seamless, lightweight, (approximately 54% lighter than traditional mesh) whilst still being durable.
- DYNAPWRAP™ technology to improve stability and give a secure fit across the foot.

MIDSOLE

- FLYTEFOAM™ Propel midsole foam.
- Non-removable FLYTEFOAM™ sockliner.

OUTSOLE

- Pinless Carbon HEXA-CLAW plate is a honeycomb carbon fibre outsole plate that eliminates the need for spikes (pins) to enhance traction and transfer of power (incr traction due more contact with ground).
- Outsole build up at high contact areas where traditional pins would sit.
- 8 clusters of hexagonal shapes.
